(The mission without return has begun
Ignition sequence starts
Ten seconds to lift off
10...9...8...7...6...5...4...3...2...1...0
Rocket in the sky
Good luck
you're on your own)

And suddenly I left the Earth
Flying through the clouds
This new countdown is getting me down
I hate this place but I decided to finish it
To save the world oh dear God hear me out

You are alone and you are lost
left all on your own
You are alone and you are lost
Left all on your own

I need you to be my friend in this mission
Feel my pain and be my king
Don't let me down
And kiss my mother for me
Oh lord I'm feeling weak
Why why you've left me here out in space

You are alone and you are lost
Left all on your own
You are alone and you are lost
Left all on your own

I move without moving
I feel without seeing
I Live without living
I'm dying in black hole

09

Good bye, good bye, Good bye
Said the sun to the sky
In that moment when we cannot see
We start to fly, like a fish in the sea
We swim into the dark
Driving millions of miles
Leaving without trace
Good bye, good bye good bye
Go the voices in my head
There are worm holes in your eyes
And stars into your bed
Good bye good bye good bye
I can't take this anymore
Good bye, good bye, good bye
And welcome to black hole

And i'm being sucked by the black hole in my chest
And I do believe it's for the best
This is how I can get
My way out, my way out, my way out
My way out, my way, my way out

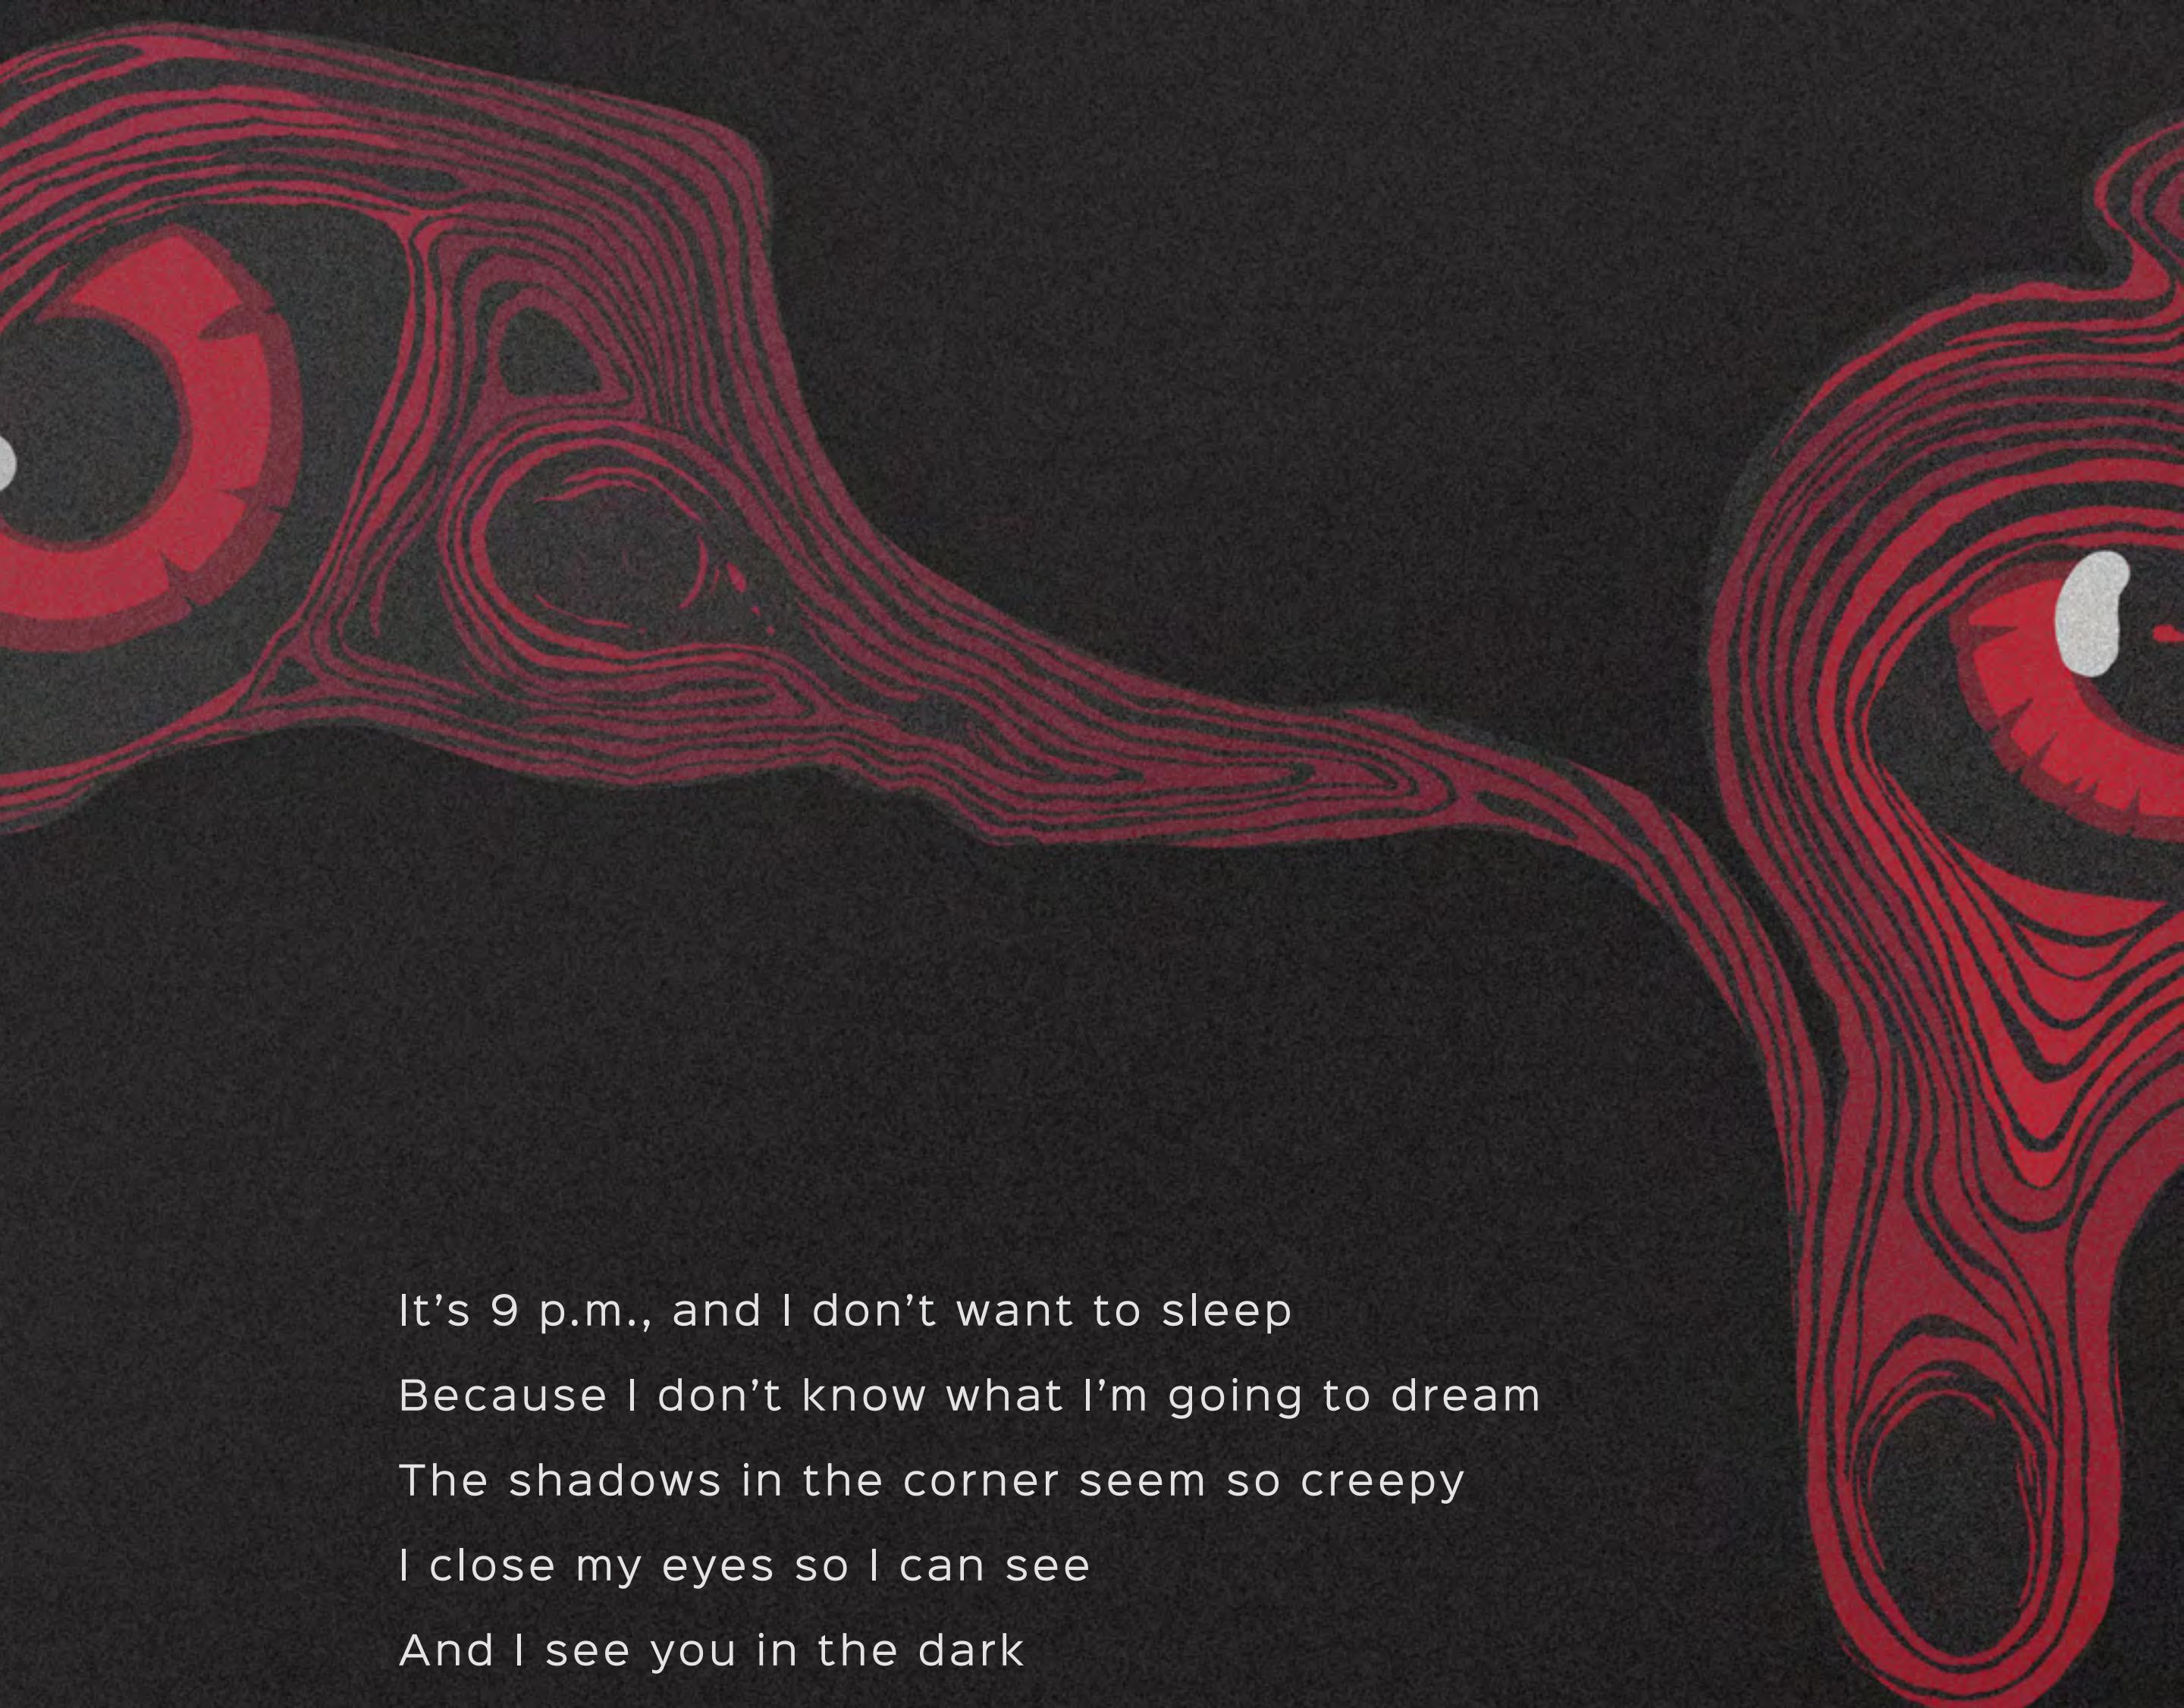

Black hole in my chest
Save me from the rage
With all the stars in my room
The love ended up burned
Everything is upside-down,
There's no more ground
The time seems stopped
I can't move, I'm stuck
There's no more light, there's no more light
There's no more light, there's no more light

And I'm being sucked
By the black hole in my chest
And I do believe it's for the best
This is how I can get
My way out, my way out, my way out
My way out, my way, my way out

08

It's 9 p.m., and I don't want to sleep
Because I don't know what I'm going to dream
The shadows in the corner seem so creepy
I close my eyes so I can see
And I see you in the dark
And I feel you in my heart

No more ghosts in my head
No more ghosts in my bed
Cause now I see them everywhere
And the end is near, I can feel everything, everything

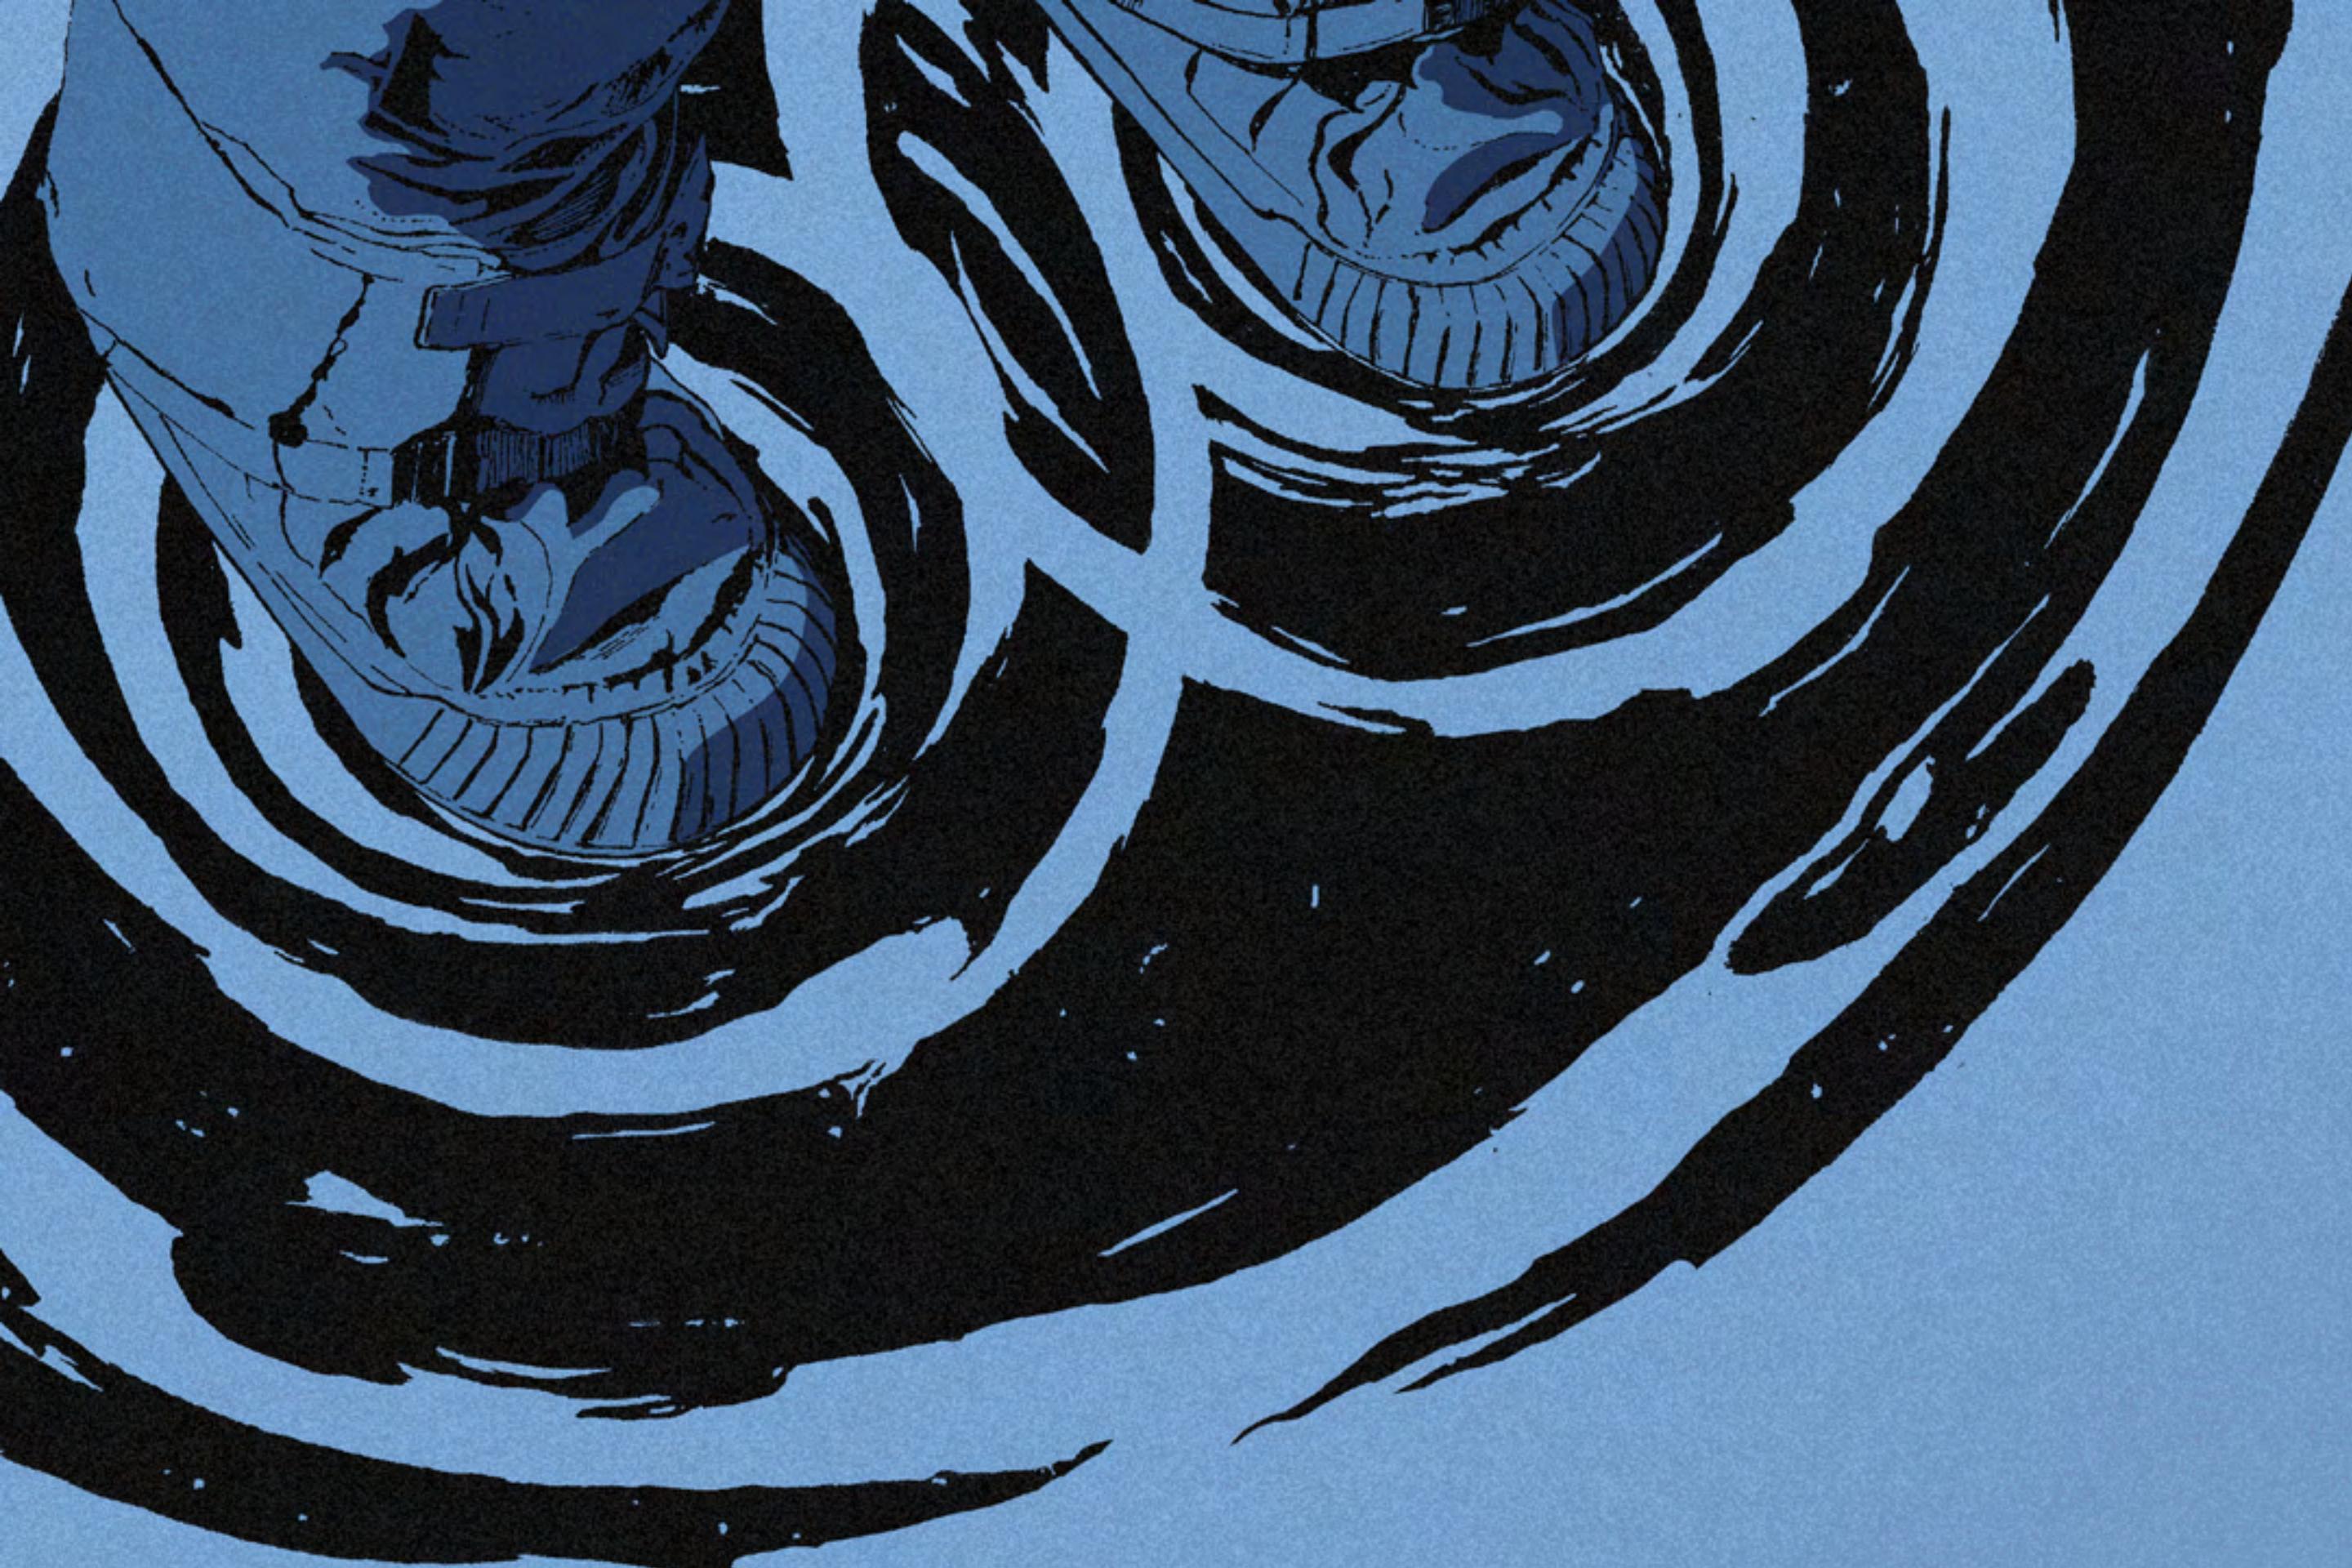

I want to see the light shining bright
This feeling in my heart
My thoughts are getting me mad
It's only the darkness mixed up with sadness
I've tried my best, I lost this test
I've lost the game, I've lost the game
I've lost the game, I've lost the game

No more ghost in my head, no more ghost in my bed
Because now I see them everywhere
And the end is here
I can't feel anything, anything

07

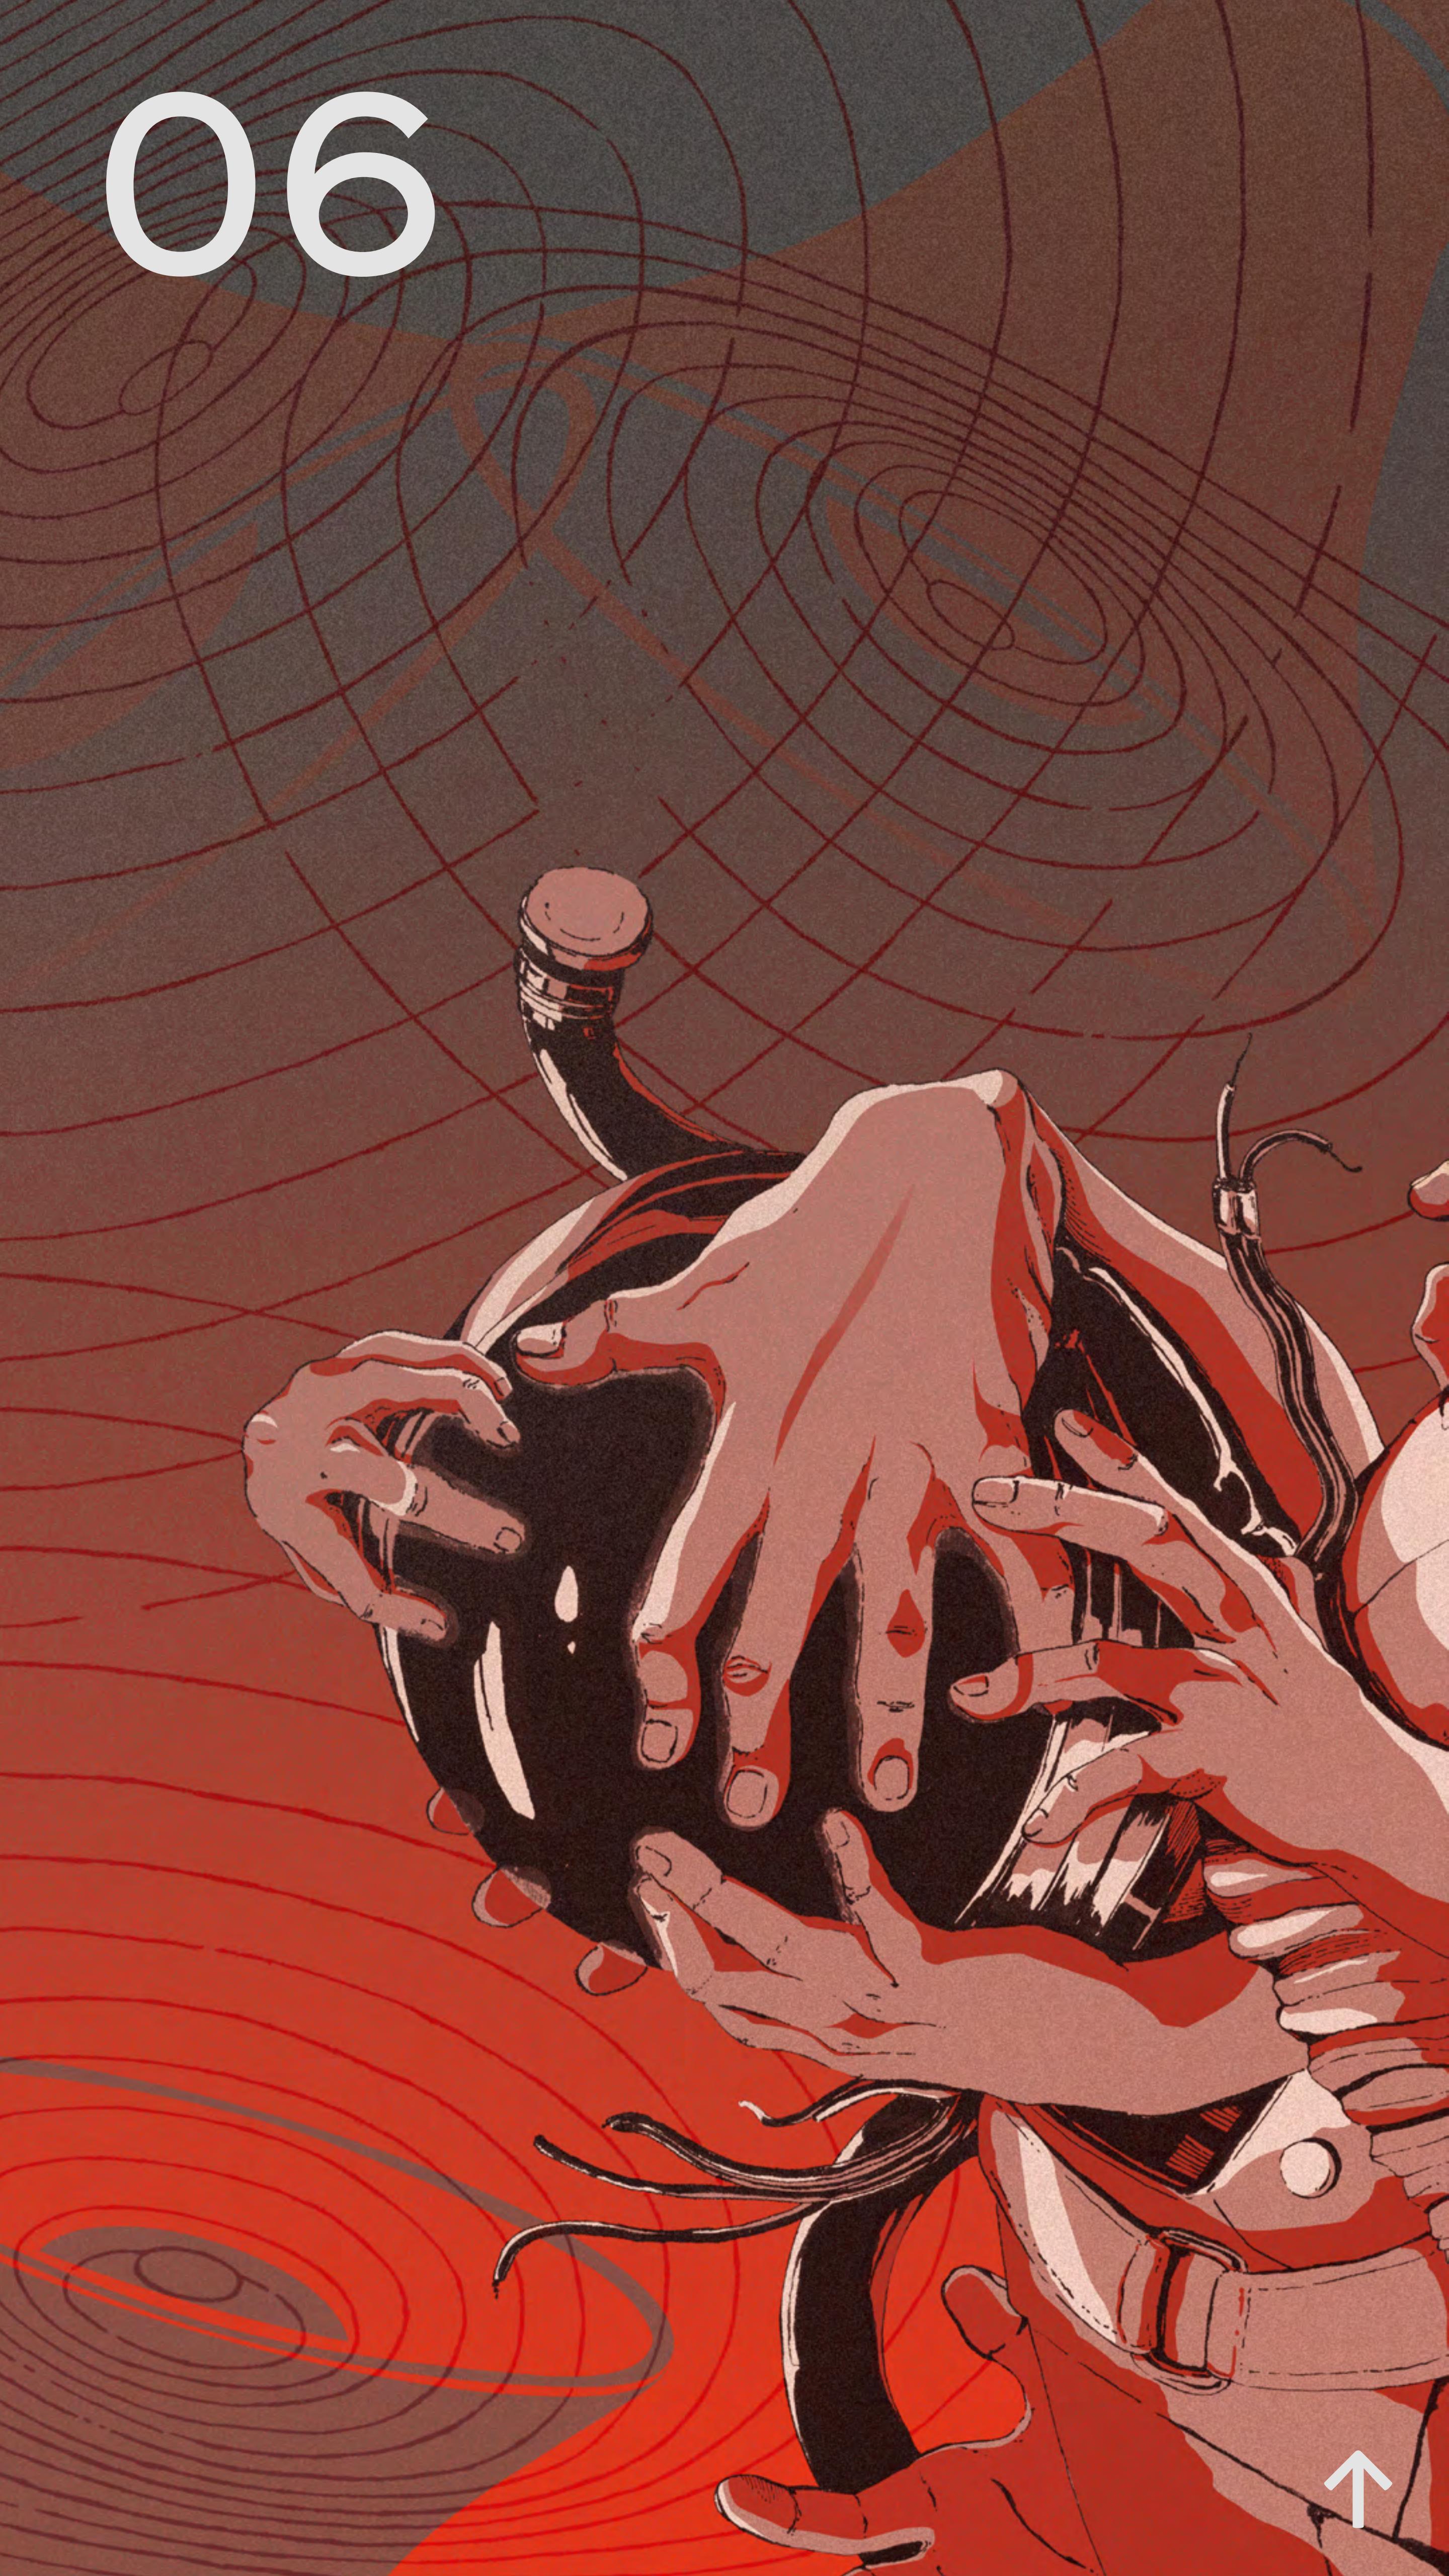

When I was young
I didn't know
What the world was about
What is love?
When I was young
It didn't seem too difficult
I was happy... In my room

When I was young
My momma told me
That my friends... Didn't exist
And then when I grew up
Everyone went away
*I understood that the world
Is not good place (x3)*
When I was young
I wanted to cross the world
Now the dream... Is gone
When I was young...

06

Here they come again
They're crawling they're looking inside
Here they come again
Their noises, their voices their noises

(They won't find out they won't, find out, why are you here, why are you here?

There's no scape, there's no scape, you're trapped, you're trapped
The snakes await, the snakes await,
You're the skull on the wall, you're the skull on the wall
There's no more light, there's no more light,
Jump, jump right now, jump, jump right now)

Beyond the moon we'll find our peace
We can't go down
We'll do what we please
Beyond the light our faith will rise
The space is wise

Here they come again
Their Voices their noises their voices
Here they come again
Their Voices their noises their voices

Pray to your God
They'll tear us apart
It breaks our hearts
No matter how far we drive away... away

Here they come again
Their Voices their noises their voices
Here they come again
Their Voices their noises their voices

(They won't find out they won't, find out, why are you here, why are you here?

There's no scape, there's no scape, you're trapped, you're trapped
The snakes await, the snakes await
You're the skull on the wall, you're the skull on the wall
There's no more light, there's no more light,
Jump, jump right now, jump, jump right now)

Here they come again
They're crawling they're looking inside
Here they come again
Their noises, their voices their noises

05

I took you by the hand
We laughed for the last time
I sang the song to my band
It's hard to be lost in my mind
let's take a look inside, let's take a look inside
I...

I didn't realize all the problems
(I took you by the hand, fuck me why?)
you had till' the last time we talked
(You took you by the hand, fuck me why?)
You told me all about it
(I took you by the hand, fuck me why?)
at my house
(at my house)

It's hard to escape from this island
This videotape fills my eyes
Running in circles in the promise land
Please explain to me why it's so difficult to cry
I...

I didn't realize All the problems
(I took you by the hand, fuck me why?)
you had till' the last time we talked
(You took you by the hand, fuck me why?)
You told me all about it
(I took you by the hand, fuck me why?)
at my house
(at my house)

Oh, bae one day we'll be together
Not today, not tomorrow, not ever
I want you to disappear as feathers
In the wind going nowhere forever
I need the one who makes me feel done
The one who asks for me when I'm gone
The one who stops me from pulling the trigger of the gun
Am I in love? Or maybe I'm just stoned

Oh, babe one day we'll be together
Not this day, not tomorrow, not ever
I want you to disappear as feathers
In the wind going nowhere forever

04

I am burning, I am burning please don't blow me oh, oh, oh
I am shining I am shining cause you turn me on
If this is Hell, if this is Hell,
I know where I belong
I'm never coming back to, the world that I loved

In this hot Black Hole
I am the Only Light
If you're around
I'll tell you some advice
Being here is what you deserve
Listen to all the tracks
Say goodbye to your friends
Heal all the cracks

Hey! here it comes again oh oh oh
Hey! All we try to say oh oh oh
Hey! You 're not insane oh oh oh
Hey! everyone is fake

*There is nothing you can control (listen up)
Too many things to resolve (X4)*

In this hot Black Hole
I am the Only Light
If you're around
I'll tell you some advice
Being here is what you deserve
Listen to all the tracks
Say goodbye to your friends
Heal all the cracks.

03

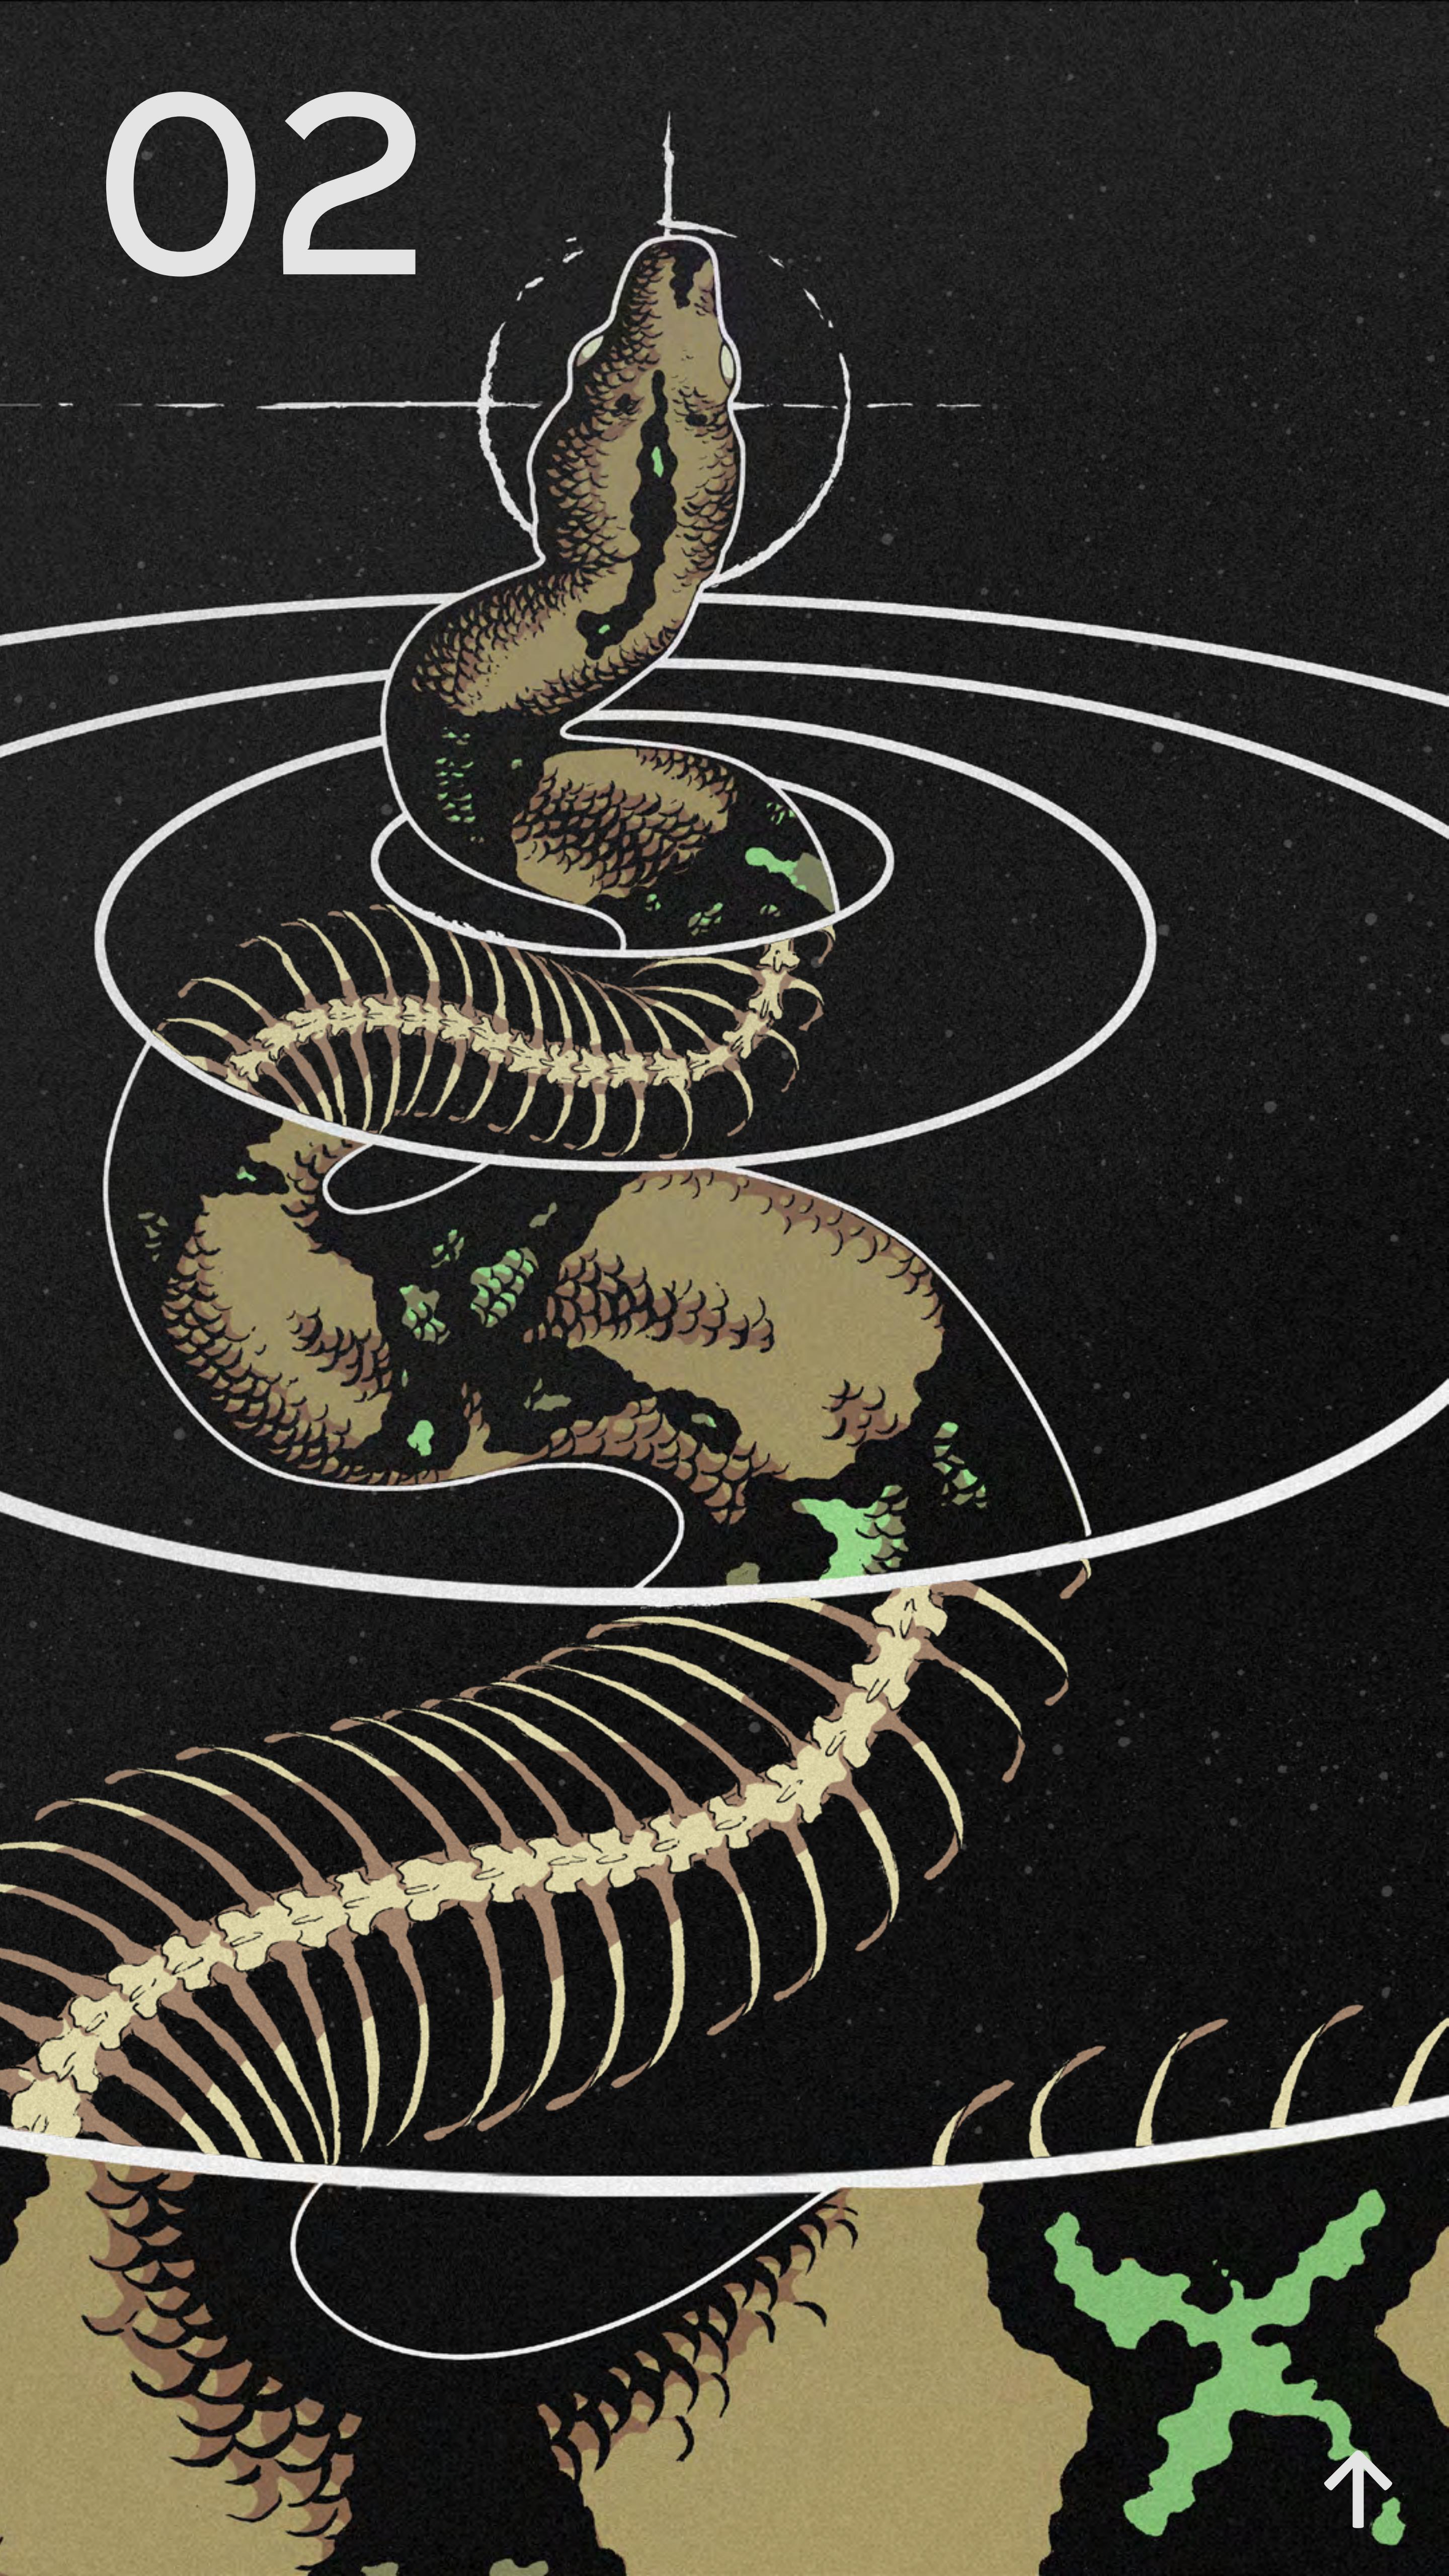

I can see the light shining on your head
How it disappears and leaving without trace
An interstellar eye it's looking at me from the sky
I can't hold this madness is growing in my heart
My heart

The skull is on the wall
I can't see my eyes
I don't hear your voice
I know you're screaming out
There's no time for doubts
Just kiss me on the grave
No one will find out
What we try to say...
To say...

Dreaming about my ghosts
They are chasing bones
Nothing could be wrong if you lay down and look above
There is no more pain and my gods are spitting rain

02

He gave me the sweetest poison I've ever had
nothing comes back
By following the snakes, I have found
Life under ground
Nothing comes back
Open your mind and you might find
That we were born blind
Nothing comes back
We'll never come back

The time, the nights, the breeze, the sky
Love, love nothing is coming back
The sun that shines the way we've died
No, no nothing is coming back
The days, the lies, the tears, the lives
No, no nothing is coming back
No, no nothing is coming back
No, no nothing is coming back

In my new world the only thing
That isn't real... Is your control
Cause I am the one
Who can see... how to be free
Come with me
We'll never come back
Nothing comes back
Wake up my son
Wake up my son
Wake up my only son
Wake... wake... (up)

01

We're saying goodbye
And the sky looks bright
We're saying goodbye
And the sky looks bright
The stars only shine in the night
The stars only shine in the night

In the dark looks bright the sky
in the dark looks bright the sky
You're going through this light
There is inside darkness
Darkness... darkness

(The mission without return has ended
You've made it you're done
The countdown has begun
10...9...8...7...6...5...4...3...2...1
Welcome home)
